Dear Mr. Johnson,

Before you decide how you vote in this election year, may I suggest that some study be made into the Candidates. I have just completed reading a book about Jimmy Carter. The book takes a strong look behind the scenes and reports the real James Earl Carter Jr. The reader can then make an objective decision on the qualification of Jimmy Carter as future President. Every voter should read this book before going to the polls this November. To vote without reading this book is like voting in the dark. You might vote for the wrong man.

The book is called Jimmy Carter/Jimmy Carter. It is written by Gary Allen and it is published by '76 Press. The first printing in August 1976. Other data; International Standard Book Number 0-89245-006-1 Library of Congress Catalog Number 76-27187

The book is paperbound and available through the American Opinion P. O. Box 2686 Seal Beach, California Zip 90740

To order send one dollar in check or money order to the above address. You may be able to find it in your local book store but if they are out of stock then you should order it immediately.

Sincerely as a fellow voter,

Gary D. Chambers
